

**February 2022**

**RE: DTX2022: READY. SET. GROW, 22 - 25 March 2022, Las Vegas, NV.**

I would like to attend **Dialysis Tech ConneXions – DTX2022: Ready. Set. Grow: Cultivate and Nurture Your Dialysis Career** 22 - 25 March 2022. This is the National Association of Nephrology Technicians/Technologists (NANT) annual educational event held in Las Vegas, NV. DTX is the premier meeting for nephrology clinical technicians and nephrology biomedical technologists. It is the ONLY program planned by technicians for technicians.

Sessions such as **Active Listening/How to Effectively Document** and **Having Difficult Conversations** will allow me to create solutions that positively impacts patient outcomes. I will have access to the PowerPoint presentations that I will share with our unit after I return from DTX, increasing the value of my attendance!

Additionally, DTX registration includes entrance to the Dialysis Solutions Center, the only exhibit area directly focused on products and services designed to help Nephrology Clinical Technicians/Nephrology Biomedical Technologists meet their clinic's needs. This is my opportunity to learn about new products and see the latest advances in dialysis technology.

This year, the registrations costs for DTX have been lowered 30% compared to DTX20. It is also multi-access – I can attend virtually by watching the live stream Wednesday – Friday mornings from 8 am – noon PDT and watch all the concurrent sessions on demand starting Wednesday afternoon.

If I can attend in person in Las Vegas, I can also go to one of the four pre-conference workshops on Home Hemodialysis, Equipment Troubleshooting, Water Treatment or Ready. Set. Survey. so that I can help us prepare for our next survey.

Here is the breakdown of DTX costs:

- All Access Registration fee: \$395 – includes one pre-conference workshop AND a 1-year membership to NANT! (I can earn up to 42 contact hours)
- Conference registration (either in person or virtual) \$280 (I can earn up to 35 contact hours)

Attending this event will help me to expand my knowledge base, enhance my skills, and widen my professional network in addition to bringing back valuable information from which the entire unit will benefit. This is an opportunity we can't afford to miss!

Sincerely,

**Your Dialysis Technician**
