RE: DTX41 – YOU are the SPARK, 25 - 28 March 2024, Las Vegas, Nevada

I would like to attend **Dialysis Tech ConneXions – DTX41: YOU are the SPARK** on Monday, 25 March – Thursday 28 March 2024. This is the National Association of Nephrology Technicians/Technologists (NANT) annual educational event held in Las Vegas, NV. DTX is the premier meeting for nephrology clinical technicians and nephrology biomedical technologists. It is the ONLY program planned by technicians for technicians.

Sessions such as **Diversity in Dialysis: Cultural and Generational Competence** and **Conflict Resolution and De-escalation** will allow me to create solutions that positively impacts patient outcomes. I will have access to the PowerPoint presentations that I will share with our unit after I return from DTX, increasing the value of my attendance!

Additionally, DTX registration includes entrance to the Dialysis Solutions Center, the only exhibit area directly focused on products and services designed to help Nephrology Clinical Technicians/Nephrology Biomedical Technologists meet their clinic's needs. This is my opportunity to learn about new products and see the latest advances in dialysis technology.

This year DTX41 is also multi-access – I can attend watch the concurrent sessions on demand after the conference so that I can earn more contact hours required for my recertification.

If I can attend in person in Las Vegas, I can also attend four hands-on sessions. These small groups will give me the best tips of how to use dialysis equipment and clinical tools.

Here is the breakdown of DTX costs:
- Full Registration fee: $475 – includes three full days of educational sessions AND a 1-year membership to NANT! (I can earn up to 34 contact hours)

Attending this event will help me to expand my knowledge base, enhance my skills, and widen my professional network in addition to bringing back valuable information from which the entire unit will benefit. This is an opportunity we can't afford to miss!

Sincerely,

Your Dialysis Technician
