

RE: DTX42 – YOUR Moment is NOW, April 1 - 4, 2025 in Las Vegas, Nevada

I would like to attend **Dialysis Tech ConneXions – DTX42: YOUR Moment is NOW** on Tuesday, April 1 – Friday April 4, 2025. This is the National Association of Nephrology Technicians/Technologists (NANT) annual educational event held in Las Vegas, NV. DTX is the premier meeting for nephrology clinical technicians and nephrology biomedical technologists. It is the ONLY program planned by technicians for technicians.

Sessions such **Infection Control and Prevention in the Dialysis Setting** and **KDOQI Life Plan and Access Guidelines that Impact Technicians** will allow me to create solutions that positively impact patient outcomes. I will have access to the PowerPoint presentations that I will share with our unit after DTX, increasing the value of my attendance!

Additionally, DTX registration includes entrance to the Dialysis Solutions Center, the only exhibit area directly focused on products and services designed to help Nephrology Clinical Technicians/Nephrology Biomedical Technologists meet their clinic's needs. I will learn about new products and see the latest advances in dialysis technology.

This year DTX42 also has a Learning Library – I can watch the concurrent sessions I was not able to attend live on demand after the conference so that I can earn more contact hours required for my recertification.

By attending live in Las Vegas, I can also attend four hands-on sessions. These small groups will give me the best tips on how to use dialysis equipment and clinical tools. Wednesday and Thursday afternoons are Deep Dive sessions,

DTX Full Registration fee: \$495 – includes three full days of educational sessions AND a 1-year membership to NANT! (I can earn up to 20 contact hours live and an additional 8 contact hours through the Learning Library)

Attending this event will help me to expand my knowledge base, enhance my skills, and widen my professional network in addition to bringing back valuable information from which the entire unit will benefit. This is an opportunity we can't afford to miss!

Sincerely,

Your Dialysis Technician
